チェコ共和国大使館

Join us for our live event online with Lara Hana Brady, who will share incredible stories behind precious artifacts from the family archive, while reflecting on the past 20 years she has spent with her father George Brady, an Auschwitz survivor, to have dialogues with children all over the world!

Lara and George, 2014

Guest speaker Lara Brady

For over 20 years now, Lara has been involved with her family's story. Growing up in Toronto, within a family with deep ties to their Czech roots, Lara was curious about one particular family member: her aunt Hana.

Lara had grown up hearing stories from her father, George, the sole survivor of his immediate family as a result of the Holocaust.

In August of 2000, a letter from Fumiko Ishioka - an educator in Tokyo, Japan brought the story of the Brady siblings into the public. Fumiko's mission to find out what happened to Hana and the discovery of her surviving brother George became the subject of the internationally bestselling book entitled "Hana's Suitcase" and in subsequent films, plays and documentaries.

Embracing the power of her family's story, Lara has travelled around the world, to speak primarily to children about her aunt's fate and the subsequent events. As we lose the generation of survivors, Lara's family story provides a closer link for children to the stories of the Holocaust and encourages children to become change agents in their own right and communities. In addition to managing the Brady family outreach programs and acting as curator for the Brady family collection, Lara also works as an advocacy communications strategist in Toronto and consults for numerous organizations.
